

Thanks for downloading this week's Different By Design Freebie, CoverPack!

If you ever need any help with your download, or you just want to say thanks, feel free to contact me at:

ElyakimSamuel@gmail.com

This is a Freeware PSD pack, Creative Commons, etc. Enjoy!

INSTRUCTIONS -----

To use this template, start by opening either smart object, depending on which you are opting to design. You can do this by simply double-clicking the thumbnail in the layer's palette. Either design within here or simply drag and drop something you've already made into the smart object and save by going to the file menu, and clicking "save". Return to the main document which should still be open to preview what your cover will look like on Facebook. When you are satisfied with your design, simply re-open the smart-object and this time, hit "save-as" and select Jpeg from the list. Upload the cover and/or profile pictures to Facebook and you are good to go!
